S. 21

To secure the United States against cyber attack, to enhance American competitiveness and create jobs in the information technology industry, and to protect the identities and sensitive information of American citizens and businesses.

IN THE SENATE OF THE UNITED STATES

January 25 (legislative day, January 5), 2011

Mr. Reid (for himself, Mrs. Feinstein, Mr. Kerry, Mr. Leahy, Mr. Levin, Mr. Lieberman, Mr. Rockefeller, and Mr. Bingaman) introduced the following bill; which was read twice and referred to the Committee on Homeland Security and Governmental Affairs

A BILL

To secure the United States against cyber attack, to enhance American competitiveness and create jobs in the information technology industry, and to protect the identities and sensitive information of American citizens and businesses.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,
- 3 SECTION 1. SHORT TITLE.
- 4 This Act may be cited as the "Cyber Security and
- 5 American Cyber Competitiveness Act of 2011".

1 SEC. 2. FINDINGS.

- 2 Congress makes the following findings:
 - (1) Malicious state, terrorist, and criminal actors exploiting vulnerabilities in information and communications networks and gaps in cyber security pose one of the most serious and rapidly growing threats to both the national security and economy of the United States.
 - (2) With information technology now the backbone of the United States economy, a critical element of United States national security infrastructure and defense systems, the primary foundation of global communications, and a key enabler of most critical infrastructure, nearly every single American citizen is touched by cyberspace and is threatened by cyber attacks.
 - (3) Malicious actors in cyberspace have already caused significant damage to the United States Government, the United States economy, and United States citizens: United States Government computer networks are probed millions of times each day; approximately 9,000,000 Americans have their identities stolen each year; cyber crime costs American businesses with 500 or more employees an average of \$3,800,000 per year; and intellectual property

- worth over \$1,000,000,000,000 has already been stolen from American businesses.
- 3 (4) In its 2009 Cyberspace Policy Review, the 4 White House concluded, "Ensuring that cyberspace 5 is sufficiently resilient and trustworthy to support 6 United States goals of economic growth, civil lib-7 erties and privacy protections, national security, and 8 the continued advancement of democratic institu-9 tions requires making cybersecurity a national priority." 10
- 11 (5) An effective solution to the tremendous 12 challenges of cyber security demands cooperation 13 and integration of effort across jurisdictions of mul-14 tiple Federal, State, local, and tribal government 15 agencies, between the government and the private 16 sector, and with international allies, as well as in-17 creased public awareness and preparedness among 18 the American people.

19 SEC. 3. SENSE OF CONGRESS.

- 20 It is the sense of Congress that Congress should
- 21 enact, and the President should sign, bipartisan legislation
- 22 to secure the United States against cyber attack, to en-
- 23 hance American competitiveness and create jobs in the in-
- 24 formation technology industry, and to protect the identi-

- 1 ties and sensitive information of American citizens and
 2 businesses by—
 3 (1) enhancing the security and resiliency of
- 3 (1) enhancing the security and resiliency of 4 United States Government communications and in-5 formation networks against cyber attack by nation-6 states, terrorists, and cyber criminals;
 - (2) incentivizing the private sector to quantify, assess, and mitigate cyber risks to their communications and information networks;
 - (3) promoting investments in the American information technology sector that create and maintain good, well-paying jobs in the United States and help to enhance American economic competitiveness;
 - (4) improving the capability of the United States Government to assess cyber risks and prevent, detect, and robustly respond to cyber attacks against the government and the military;
 - (5) improving the capability of the United States Government and the private sector to assess cyber risk and prevent, detect, and robustly respond to cyber attacks against United States critical infrastructure;
 - (6) preventing and mitigating identity theft and guarding against abuses or breaches of personally identifiable information;

- (7) enhancing United States diplomatic capacity and international cooperation to respond to emerging cyber threats, including promoting security and freedom of access for communications and information networks around the world and battling global cyber crime through focused diplomacy;
 - (8) protecting and increasing the resiliency of United States' critical infrastructure and assets, including the electric grid, military assets, the financial sector, and telecommunications networks against cyber attacks and other threats and vulnerabilities;
 - (9) expanding tools and resources for investigating and prosecuting cyber crimes in a manner that respects privacy rights and civil liberties and promotes American innovation; and
 - (10) maintaining robust protections of the privacy of American citizens and their on-line activities and communications.
